Dear Homeowners,

Tempe Gardens is doing well as a community, and the board is taking steps to ensure our long-term success. We have been repairing items as soon as they are identified, updating infrastructure (lights, south pool), and planning for large projects the community wants completed. As we all know the cost of everything has increased this year. Inflation has hit the economy, the prices of every good and service has increased. As a result, to ensure our community's success the board has voted to increase the 2023 assessment by \$20 each month.

It is important to mention the board is taking steps to save money where possible. A primary example is that our community will not be over seeded this winter. Not only will this save money, but it was also requested by state agencies due to the water shortage facing the south western United States. We are also taking steps to decrease our long-term water usage with Xeriscaping.

The xeriscaping is a project our community has been asking for and planning for years. We have a design ready for the entire community, and will start the project in the coming months at the south pool. The project will be community wide, and has had input from numerous homeowners. We will not be removing all the grass, but we are aiming to save money by cutting down on our community's long-term water usage.

Xeriscaping Tempe Gardens will be an expensive project, the section we will be completing around the pool will cost a little over \$70,000. The community has shared a desire to complete this kind of project along Mill Avenue, and we will need to budget so we can complete that project accordingly. It's also been made known that the community would like new play grounds. And in a few years' time, we will need to begin looking at painting the community as well. All these projects benefit the community and require the long-term budget planning.

Similarly, our community is aging and repairs are becoming more frequent. We have received several quotes to replace a large section of our plumbing, and it will cost around \$20,000. We are expecting more on-going maintenance like this, and that is included in the budget. We have not needed any kind of special assessment and have been able to repair damage as soon as it is identified. Many HOA's require special assessments to address roof repairs and damaged plumbing, and for the past several years we have not. The boards vision is to continue to avoid special assessments.

Recognizing where we want to be long term, and identifying what is required to maintain the property, the dues will need to be increased by \$20 this year. In previous years the HOA has elected to not increase the dues, and even decreased the dues when the submetering was installed. Unfortunately, not taking an increase is no longer possible. Thank you for everything you do for our community. If you have any questions, please reach out to the board through Ogden or by attending one of the board meetings.

Sincerely,

Axel Ferguson
Tempe Gardens Board President
